General:
The wireless table / wall button alarms when a person presses the button. The button can be easily placed on a table or can be mounted on the wall. There is an option inside to flash a weak light behind the button every 2 seconds. In this way it can be easily found in the dark. To prevent fall presses you can choose to change the settings so that the button needs to be pressed for 2 seconds before it alarms. This button can be used in combination with all the Daza receivers and pagers.

Opening the device:
Remove the screw on the side of the cover.

Rotate the cover until it stops and lift the cover.

Battery placement:
Place the battery as indicated in figure 2.
Pay attention to the polarity of the battery, plus (+) & minus (-).

Warning!
If you replace the battery with an incorrect battery type, the 8014 can be damaged. Dispose of used batteries according to local regulations.

Function settings
The 8014 has 4 dipswitches which corresponds to the following settings:

<table>
<thead>
<tr>
<th>Switch</th>
<th>Function</th>
<th>Stand</th>
<th>Option</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Background flashing light red button</td>
<td>On*</td>
<td>Backlight on</td>

8014
Wireless table / wall button
2014-06-10 - V1.0

Installation

Connecting external input
An external component can be connected with 2 wires on the external input. Pay attention that it needs to be a
normally closed contact (NC).

Inleren
The 8014 must be programmed into a receiver or Pager so that it can communicate with them. If the external input is
used, it must be programmed separately from the button as a unique transmitter. Refer to the manual of the
corresponding receiver how to program the 8014.

Specifications
Frequency (MHz): 869.

Electronically
Internal Battery: 3V battery type CR123
Note: Dispose of used batteries according to local regulations.
Power consumption: 35 mA (in alarm), 20μA in idle.
Battery lifetime: approximate 5 years (with one alarm a day)
